

Preparing P.C's for using Student Information System (SIS) Oracle Applications 11i –New Version

1. Open ([Internet Explorer](#)) or any web browser
2. Enter the URL Address : (<http://sis.kuniv.edu:8005>)
3. Press on the link ([Apps Logon links](#)) then press ([E-Business Home Page](#))
4. Enter Username and Password (the same Username and the corresponding password in the old version of the system)

Note : To avoid repeating the previous steps each time, do one of the following :

- Add the current URL address of the Username and Password Screen to your (**Favorites**)
 - Put a shortcut for the current URL address of the Username and Password on Desktop, by going to (**File**) menu then (**Send**) then (**Shortcut to Desktop**)
5. You will find the [User Privileges](#) on the left side, press on the appropriate one, then you will find on the right side of the same screen all the [Functions](#) corresponding to the privilege, Press on any function
 6. You will notice a bar under the address bar asking you to install the ActiveX control ([Oracle JInitiator](#)), Install it then press on the same function that you chooses in step (5) or any function
 7. You will find a message asking you to install ([Oracle JInitiator](#)), install it then press on the same function that you chooses in step (5) or any function
 8. Choose the default Actions till you will find a warning message, Press on ([Grant always](#))

Note :

- The steps from (6) to (8) done only one time, when preparing the P.C to use the new version of SIS
- If you face a problem with any function, close the ([JInitiator Window](#)) then choose the same function again

The screen on the right side is ([JInitiator Window](#))

- Check the **Pop-up blocker** of the **Internet Explorer** and in any **Toolbar** like **Yahoo** or **Google**, it should be (**Off**)
- Check if ([Adobe Acrobat Reader](#)) installed on the P.C, if it is not, install it
- If the **Internet Explorer** crashes, you have to remove all the toolbars installed on the P.C (**Yahoo** or **Google** or ..)
